About Me

A 24-year-old industrial instrumentation technician with 30 months of theoretical studies and 24 months of hands-on apprenticeship at Sorfert, a leading Algerian petrochemical company producing ammonia and urea fertilizers. Skilled in the calibration, maintenance, and diagnosis of transmitters and all types of industrial sensors, as well as valve workshop maintenance and servicing of control/regulator valves. Comfortable working on real plant equipment, reading P&ID and electrical diagrams, and using specialised diagnostic tools (TestREC, Hart Communicator). Rigorous, safety-conscious, and ready to contribute to industrial operations.

Professional Experience

Instrumentation Apprentice — Sorfert-SPA (Ammonia & Urea Fertilizers) 2022 – 2025

- Completed 24 months as an apprentice inside a major petrochemical plant producing ammonia, urea fertilizers, and related products.
- Performed hands-on daily maintenance tasks alongside senior technicians, contributing to real plant operations.
- Calibrated and maintained transmitters (pressure, temperature, flow, level) and all types of industrial sensors.
- Carried out valve workshop maintenance and servicing of control/regulator valves.
- Read and interpreted P&ID and electrical diagrams for field diagnostics.
- Used TestREC and Hart Communicator for valve testing and field diagnostics.

Instrumentation Internship — Institut INSFP Es Sénia (Oran) During training

- Practical workshops on measurement instruments, calibration benches, and industrial sensor wiring.
- Applied theoretical knowledge to real instrumentation setups under instructor supervision.

Head of Financial & Stock Management / Receptionist — Anderson (National Delivery Company) 2026 – Present

- Manage daily financial records, cash handling, and expense tracking.
- Oversee stock management: reception, verification, storage, and inventory follow-up.
- Handle customer reception, phone calls, and front-desk coordination.
- Coordinate with suppliers and internal teams to ensure smooth operations.

Salesman and Computer Repairer — PRO FIX 2022 – 2023

- Sold and repaired desktop and laptop computers.
- Provided technical advice and quality customer service.
- Handled hardware troubleshooting, OS installation, and driver configuration.

Education

Institut National Spécialisé de la Formation Professionnelle (INSFP) Chahid Saad Mohamed — Es Sénia, Oran
Specialised training in industrial instrumentation.

Scientific Baccalaureate (final year) — Lycée Mohammed Mhadji Habib, Oran

Training

Advanced Technician in Industrial Instrumentation — Sorfert-SPA
30 months of theoretical studies followed by 24 months of apprenticeship within the Sorfert petrochemical company. Certification obtained through professional training in an ammonia and urea fertilizer production environment, combining

classroom theory with daily hands-on maintenance work on real industrial equipment.

Technical Skills

Instrumentation	Calibration, maintenance and diagnosis of transmitters (pressure, temperature, flow, level); all types of industrial sensors
Valve Maintenance	Valve workshop maintenance, control/regulator valve servicing and calibration
Documentation	Reading and interpretation of P&ID and electrical diagrams
Specialised Software	TestREC (industrial valve testing), Hart Communicator (field diagnostics)
Computer Hardware	PC assembly, hardware diagnosis & repair, OS installation, driver configuration
Office Software	Microsoft Word, Excel, PowerPoint
Administrative Skills	Cash handling, stock/inventory management, reception, customer service, supplier coordination

Languages

Arabic	Fluent (native language)
English	Intermediate (very good technical comprehension, professional vocabulary)
French	Intermediate (good technical comprehension, to be strengthened in speaking)
